Simms, Texas

Hey Michael,

Been a while. Hope all is well with you and life. All is great here in the Permian. About to go through Murchison in the fall and advance from Mud to Wellsite Supervisor. The getting is good. Definitely got my bang for my buck out of you guys. Jumped straight into consulting after I finished vacationing. Anyways, I have a couple of people coming through your school. I know you have a waiting list at the moment. Please let me know if you can fit any in and when. Preferably before year end. One is already booked for October. Wouldn't send them anywhere else. I have put a few graduates in jobs that showed potential since I left there. Tell Michelle and Terry I send my best.

Regards,

Nathan

Hi Mike,

Greetings from Italy.

I wanted to let you know that I am working for "Newpark International" (AVA drilling fluids & Services).

During my first interview in January, after many tests and conversations with HR and a senior drilling fluids engineer, I was hired on the same day. I also Had to take a company test on which I scored 94 out of 100. I must admit that 90% of what I learned in your course in Tyler was necessary (to pass). The other 10% I have acquired here through the different Mud programs and formulation (Evolution, Deep drill/Flex drill, LT-IE-75).

I Had to do all the tests for OBM (PoM, ES, chlorides, lime, hthp). My first destination should be in Albania to see OBM, or Basilicata here in Italy.

I made a good impression on everyone, thanks to you (DFE tech).

Thank you for Your Knowledge Mike!

Say hello to Harrison, Brian, Liz and Michelle

Best Regards,

Gabriel Azzarelli

Carlos
Newpark Oilfield Services
Drilling Fluids Engineer

Good evening sir,

I just wanted to take a couple of seconds to tell you THANK YOU for everything that you taught me and for given me the opportunity and privilege to attend to your school. It was a great experience and it is very pleasant that every time I said that I am a DFE tech graduate, I get automatically a lot of respect and trust from people in the field.

One more time sir, THANK YOU!!

If at any time I may be of any help, please do not hesitate to contact me.

Carlos C.

I am pleased to inform you that I have accepted a position as a Mud Engineer with National Oilwell Varco (NOV). I start April 8th, working in Ohio. I want to thank everyone there for giving me the knowledge necessary to succeed. If I ever pass through Tyler I'll be sure to stop by.

Thank You,
John S
